

Queen Creek Town Code

UTILITIES

Section 16-4-22 Interceptors

- A. Grease, oil and sand interceptors shall be provided when the public works director determines that they are necessary for the proper handling of wastewater containing grease or oil in excessive amounts or any flammable wastewater, sand and other harmful ingredients. However, such interceptors shall not be required for private living quarters or dwelling units.
- B. All interceptors shall be of a type and capacity approved by the public works director and shall be located as to be readily and easily accessible for cleaning and inspection.
- C. Grease and oil interceptors shall be constructed of impervious materials capable of withstanding abrupt and extreme changes in temperature. They shall be of substantial construction, watertight and equipped with easily removable covers. When bolted covers are required, they shall be gastight and watertight.
- D. Where installed, all grease, oil and sand interceptors shall be maintained by the owner, at the owner's expense, in continuously efficient operation at all times. The owner shall keep written records of all cleaning, repair, calibration and maintenance required under this subsection. The owner shall keep such records at the facility for a minimum of three years.
